

Cesium Iodide highest purity doped with Thallium Iodide

Product number :	424044
CAS-No. :	CsI [7789-17-5] TlI [7790-30-9]
Appearance :	colourless powder
Formula :	CsI
Formula weight :	259.81
Cesium content :	51.16 % (theoretical)
Specific gravity :	4.51 g/cm ³
Melting point :	621 °C
Solubility :	74 g in 100 g H ₂ O at 20°C

Cesium Iodide highest purity doped with Thallium Iodide

Applications	Cesium iodide is a highest purity product particularly used for scintillation purposes, e.g. in medical imaging
Safety and handling	Cesium iodide is hygroscopic and should thus be stored in tightly closed containers under exclusion of moisture.
Packaging	Polyethylene bottles or bags with aluminium barrier in drums (fibre drums, clamping ring drums, steel drums, steel drums with polypropylene inner lining). The aluminium barrier prevents diffusion of moisture into the product. Alternative packing on request. Smaller units available at surcharge.
Transport classification	Please refer to the safety datasheet of this product.
Cesium product range	acetate aluminium fluoride bicarbonate bromide carbonate chloride fluoride hydrogen carbonate hydroxide, aqueous solution or monohydrate iodide metal nitrate sulfate <i>available in various grades, other products on request</i>
